PLAN OF OPERATIONS FOR MINING ACTIVITIES ON NATIONAL FOREST SYSTEM LANDS		
Submitted by: <i>Jeffrey L. Sayres</i> Signature	Managing Member Title	Date (mm/dd/yy) <i>2/25/02</i>
Plan Received by: Signature	Title	Date (mm/dd/yy)
I. GENERAL INFORMATION		
A. Name of Mine/Project: <i>Pine Spring / White Basin</i>		
B. Type of Operation (lode, placer, mill, exploration, development, production, other): <i>Placer</i>		
C. Is this a <input type="checkbox"/> new/ <input checked="" type="checkbox"/> continuing operation? (check one). If continuing a previous operation, this plan <input type="checkbox"/> replaces <input checked="" type="checkbox"/> modifies <input type="checkbox"/> supplements a previous plan of operations. (check one)		
D. Proposed start-up date (mm/dd/yy) of operation: <i>3/01/02</i>		
E. Expected total duration of this operation: <i>1000 feet</i>		
F. If seasonal, expected date (mm/dd/yy) of annual reclamation/stabilization close out: <i>3/01 - 11/01</i>		
G. Expected date (mm/dd/yy) for completion of all required reclamation: <i>11/15/02</i>		
II. PRINCIPALS		
A. Name, address and phone number of operator: <i>Jeffrey L. Sayres</i>	<i>2016 So. Mountain Ave Pocatello, Idaho 83604 208-233-0380</i>	
B. Name, address, and phone number of authorized field representative (if other than the operator). Attach authorization to act on behalf of operator.		
C. Name, address and phone number of owners of the claims (if different than the operator):		
D. Name, address and phone number of any other lessees, assigns, agents, etc., and briefly describe their involvement with the operation, if applicable:		

(If more space is needed to fill out a block of information, use additional sheets and attach form)

MHA NO. 81109

P09/11

ID=208 677 4879

FS-2000-B (7/95)

CASE NO. 06050222 (Expiry 10/1/02)

III. PROPERTY OR AREA

Name of claim, if applicable, and the legal land description where the operation will be located.

MCN	Name	Section	Township	RANGE
357116, 347501		2 11	13 North	16 WEST
309491, 357114		12 + 162	17 North	16 WEST
347496, 347502		2 + 1	13 North	16 WEST
212176, 357115		11 + 12	13 North	16 WEST
347497, 309291		2 + 17	17 North	16 WEST
357113, 357123		1 + 16	17 North	16 WEST

IV. DESCRIPTION OF THE OPERATION

A. Access. Show on a map (USGS quadrangle map or a National Forest map, for example) the claim boundaries, if applicable, and all access needs such as roads and trails, on and off the claim. Specify which Forest Service roads will be used, where maintenance or reconstruction is proposed, and where new construction is necessary. For new construction, include construction specifications such as widths, grades, etc., location and size of culverts, describe maintenance plans, and the type and size of vehicles and equipment that will use the access routes.

All access will be using existing Roads to the area.

B. Map, Sketch or Drawing. Show location and layout of the area of operation. Identify any streams, creeks or springs if known. Show the size and kind of all surface disturbances such as trenches, pits, settling ponds, stream channels and run-off diversions, waste dumps, drill pads, timber disposal or clearance, etc. Include sizes, capacities, acreage, amounts, locations, materials involved, etc.

(If more space is needed in this box for information, use additional sheets and attach form)

-2-

C. Project Description.

Describe all aspects of the operation including mining, milling, and exploration methods, materials, equipment, workforce, construction and operation schedule, power requirements, how clearing will be accomplished, topsoil stockpile, waste rock placement, tailings disposal, proposed number of drillholes and depth, depth of proposed suction dredging, and how gravels will be replaced, etc. Calculate production rates of ore. Include justification and calculations for settling pond capacities, and the size of runoff diversion channels.

This will be a surface mine. We will gather material first from the surface, and then start production on outcrops to systematically quarry the layers of Quartzite stone.

We will use an excavator to mine with, after the surface material has been gathered from the sites.

We will stockpile any top soil found on the sites for use in reclamation. We will use front end loaders to move material around on the sites and for moving pallets. Some pallets will be stored for short periods while waiting to be transported off the mountain.

(If extra space is needed to fill out a block of information, use additional sheets and attach them)

D. Equipment and Vehicles. Describe that which is proposed for use in your operation (Examples: drill, dozer, wash plant, mill, etc.). Include: sizes, capacity, frequency of use, etc.

Excavator, Rubber-Tire Loader, ~~Excavator~~ Flatbed truck, pick up truck.

Excavator - EX 300 Hitachi
Loader - L90C VOLVO
Truck - Scania ...

E. Structure. Include information about fixed or portable structures or facilities planned for the operation. Show locations on the map. Include such things as living quarters, storage sheds, mill buildings, thickener tanks, fuel storage, powder magazines, pipelines, water diversions, trailers, sanitation facilities including sewage disposal, etc. Include engineering design and geotechnical information for project facilities, justification and calculations for sizing of tanks, pipelines and water diversions, etc.

(If more space is needed to fill out a block of information, use additional sheets and attach, form)

V. Environmental Protection Measures (43 CFR 226.5)

- A. Air Quality. Describe measures proposed to minimize impacts on air quality such as obtaining a burning permit for slash disposal or dust abatement on roads.

The existing Roads are well graded for the most part, and dust should not be a problem at the mine site.

- B. Water Quality. State how applicable state and federal water quality standards will be met. Describe measures or management practices to be used to minimize water quality impacts and meet applicable standards.

1. State whether water is to be used in the operation, and describe the quantity, source, methods and design of diversions, storage, use, disposal, and treatment facilities. Include assumptions for sizing water conveyance or storage facilities.
2. Describe methods to control erosion and surface water runoff from all disturbed areas, including waste and tailings dumps.
3. Describe proposed surface water and groundwater quality monitoring, if required, to demonstrate compliance with federal or state water quality standards.
4. Describe the measures to be used to minimize potential water quality impacts during seasonal closures, or for a temporary cessation of operations.
5. If land application is proposed for waste water disposal, the location and operation of the land application system must be described. Also describe how vegetation, soil, and surface and groundwater quality will be protected if land application is used.

(If more space is needed to fill out a block of information, use additional sheets and attach form)

c5>

C. Solid Wastes. Describe the quantity and the physical and chemical characteristics of solid waste produced by the operation. Describe how the wastes will be disposed of including location and design of facilities, or treated so as to minimize adverse impacts.

We will have a portable toilet on site, that will be serviced on a regular basis by a qualified company.

D. Scenic Values. Describe protection of scenic values such as screening, slash disposal, or timely reclamation.

The way we will quarry should not take away from any scenic values in the area.

E. Fish and Wildlife. Describe measures to maintain and protect fisheries and wildlife, and their habitat (includes threatened, endangered, and sensitive species) affected by the operations.

F. Cultural Resources. Describe measures for protecting known historic and archeological values, or new sites in the project area.

We will hire a certified archaeologist to clear the area of any cultural resources. If any are found, we will mark boundaries accordingly, as not to disturb the area.

(If more space is needed in this block of information, use additional pages and attach them.)

-6-

G. Hazardous Substances.

- Identify the type and volume of all hazardous materials and toxic substances which will be used or generated in the operations including cyanide, solvents, petroleum products, mill, process and laboratory reagents.

None will be stored on the site at any time.

- For each material or substance, describe the methods, volume, and frequency of transport (include type of containers and vehicles), procedures for use of materials or substances, methods, volume, and containers for disposal of materials and substances, security (fencing), identification (signing/labeling), or other special operations requirements necessary to conduct the proposed operations.

- Describe the measures to be taken for release of a reportable quantity of a hazardous material or the release of a toxic substance. This includes plans for spill prevention, containment, notification, and cleanup.

(If more space is needed to fill out a block of information, use additional sheets and attach form)

H. Reclamation. Describe the annual and final reclamation standards based on the anticipated schedule for construction, operations, and project closure. Include such items as the removal of structures and facilities including bridges and culverts, a revegetation plan, permanent containment of mine tailings, waste, or sludges which pose a threat of a release into the environment, closing ponds and eliminating standing water, a final surface shaping plan, and post operations monitoring and maintenance plans.

We will stockpile any top soil, when available. Most of the area is solid rock and will lend itself to minimal to no top soil. When divided, we will stone any stone face, and redistribute any top soil if applicable, and seed accordingly.

VI. FOREST SERVICE EVALUATION OF PLAN OF OPERATIONS

A. Required changes/modifications/special mitigation for plan of operations:

(If more space is needed to fill out a block of information, use additional sheets and attach, form)

OMB NO. 2506-0102 (EPA) 131/02

B. Bond.

Reclamation of all disturbances connected with this plan of operations is covered by Reclamation Performance Bond No. _____, dated (mm/dd/yy) _____, signed by _____ (Principal) and _____ (Surety), for the penal sum of _____. This Reclamation Performance Bond is a guarantee of faithful performance with the terms and conditions listed below, and with the reclamation requirements agreed upon in the plan of operations. This Reclamation Performance Bond also extends to and includes any unauthorized activities conducted in connection with this operation.

The bond amount for this Reclamation Performance Bond was based on a bond calculation worksheet. The bond amount may be adjusted during the term of this proposed plan of operations in response to changes in the operations or to changes in the economy. Both the Reclamation Performance Bond and the bond calculation worksheet are attached to and make part of this plan of operations.

Acceptable bond securities (subject to change) include:

1. Negotiable Treasury bills and notes which are unconditionally guaranteed as to both principle and interest in an amount equal at their par value to the penal sum of the bond; or
2. Certified or cashier's check, bank draft, Post Office money order, cash, assigned certificate of deposit, assigned savings account, blanket bond, or an irrevocable letter of credit equal to the penal sum of the bond.

VII. TERMS AND CONDITIONS

- A. If a bond is required, it must be furnished before approval of the plan of operations.
- B. Information provided with this plan marked confidential will be treated in accordance with the agency's laws, rules, and regulations.
- C. Approval of this plan does not constitute certification of ownership to any person named herein and/or recognition of the validity of any mining claim named herein.
- D. Approval of this plan does not relieve me of my responsibility to comply with other applicable state or federal laws, rules, or regulations.
- E. If previously undiscovered cultural resources (historic or prehistoric objects, artifacts, or sites) are exposed as a result of operations, those operations will not proceed until notification is received from the Authorized Officer that provisions for mitigating unforeseen impacts as required by 36 CFR 228.4(e) and 36 CFR 600 have been compiled with.
- F. This plan of operations has been approved for a period of _____ or until (mm/dd/yy) _____. A new or revised plan must be submitted in accordance with 36 CFR part 228, subpart A, if operations are to be continued after that time period.

(If more space is needed in just one block of information, use additional sheets and attach them)
